

# BRUSHING REPORT CARD

## EXCELLENT CARE

Brushing after each meal for at least 2 minutes and flossing daily. Braces are shiny/clean.  
**GREAT JOB! GOLD COIN**

# A+

## ADEQUATE CARE

Minimal plaque or inflammation likely good brushing with no flossing.

# B

## POOR CARE

Plaque building up. No gingivitis yet but gums are swelling from food not being cleaned off your braces.  
**YOU MUST DO BETTER!**

# C

## CONTINUED POOR CARE/INFECTION

Areas of red are bacterial infection, you now have **GINGIVITIS!** Your gums now bleed when you brush. If hygiene is not improved permanent tooth damage will occur. If not improved wires will be removed, your treatment will be longer or discontinued.

# D

## OVERGROWTH OF TISSUE

**LAST WARNING.** Continued neglect. Gums are growing over your braces. Wires must be removed until either condition improves or braces will be removed.

# D-

## DECALCIFICATION

Discontinuation of treatment. Braces must be removed. Irreversible damage.

# F
